Sample Student Expense Budget for International Students
2010-2011

In considering an application for financial aid, we must establish an estimated cost of attendance for each student. This cost is for the nine-month academic year and is based on only the student's expenses. This sheet lists the figures used in all financial aid calculations. Allowable expenses include tuition, fees, room, board, books, transportation, medical and personal expenses related to your attendance at PSR. Childcare expenses can be factored in for students with dependent children. Consumer debt payments, car payments, charitable gifts, legal fees, life insurance, etc. are not considered allowable expenses. If you have questions about expenses, please contact the Financial Aid Office at 510-649-2469.

While expenses for other family members are not factored into the standard student budget, we suggest adding \$1500-\$2000 to the budget estimate for each dependent in the family. Students with childcare expenses for dependents may submit documentation of these expenses for consideration in a budget adjustment.

The non-tuition figures above are based on averages from the students throughout the GTU consortium. Actual costs for non-tuition costs will vary from student to student. We recommend that students create their own budget using their actual or projected costs to estimate their costs most accurately. Students whose budgets exceed the standard budget may contact the Financial Aid Office for evaluation of their personal cost of attendance.

Tuition figures are subject to final approval by the PSR Board of Directors. For a complete listing of tuition, fees and expenses please visit the “Expenses and Budget” section of the Admissions section at www.psr.edu.
