

2022-2023 Cost of Attendance
Effective June 1, 2022

To establish a student's financial need and the total aid a student may receive under the Federal Direct Loan and Federal Work-Study programs, PSR Financial Aid calculates an estimated cost of attendance, or standard student budget, for each financial aid applicant. Listed below are the cost components and amounts used in determining an applicant's cost of attendance for the Fall and Spring enrollment periods. Costs incurred prior to the start of the academic year and costs that do not directly apply to the categories listed below are generally not considered when establishing a student's financial aid package.

The non-tuition figures listed are provided as estimates for the 2022-2023 academic year. Actual costs for non-tuition expenses will vary from student to student. We recommend that each student create a personal budget using actual or projected costs to estimate one's budget and financial need most accurately. Additions and/or adjustments may be considered for each student's Cost of Attendance (COA) by request and must provide appropriate documentation.
