SCIENTIFIC TESTING GUIDELINE & PERMISSION FOR TESTING/SAMPLING

The Badè Museum of Biblical Archaeology requires adherence to the following policy, and completion and approval of this permission form in order to conduct scientific tests on objects in its holdings.

Scientific testing on objects in the Badè Museum of Biblical Archaeology is allowed when such testing provides data otherwise unattainable through non-destructive means. Non-destructive material science testing, or minimally invasive sampling, is encouraged and may be permitted for whole or relatively complete objects. Fragmentary objects may be sampled, however those samples may be used in destructive testing only if deemed appropriate by the staff of the Museum and approved by the Director. Copies of the unpublished data received from testing and of any publications that include data from Museum samples must be provided to the Museum. After publication, or the lapse of 2 years after testing, these data may be added to our Museum's database, which is open access under Creative Commons licensing.

Object Name/Description**

Accession # (if applicable)

** Attach additional sheet if necessary
